CALIFORNIA ASSOCIATION OF NURSERYMEN,

CENTRAL CALIFORNIA NURSERYMEN'S ASSOCIATION

AMERICAN HORTICULTURAL SOCIETY

CALIFORNIA HORTICULTURAL SOCIETY

ROYAL HORTICULTURAL SOCIETY (OF ENGLAND)

NEW ITEMS

During the last 10 or 12 years we have doubtless imported the greatest assortment of new and rare woody plants brought into the country during that period.

Also we have been working pretty hard at plant breeding during the same period with rather encouraging results.

We are continually dropping common lines and concentrating on **novelties and specialties**. These are the things that are in demand nowadays, hence this list is well worth very careful study if you take interest in trees and shrubs which are out of the ordinary.

Several novelties either imported or originated by ourselves are now being introduced on an exclusive basis by certain first-class retail catalog houses who wish "leaders" of high quality. We have more of these items coming along and shall be glad to explain the arrangement on request.

EXPLANATION OF HARDINESS RATINGS

As this list goes all over the U. S. A. and also abroad, we believe it a good idea to indicate hardiness. This has been done by giving after the name of each item a number in () indicating the zone up to which it is considered hardy.

Our authority through Zone 7 is Rehder's Handbook. For Zones 8 to 10 we have been guided by Pacific Coast experience and have sub-divided Zone 9 so that

(9) indicates probably safe to 20° (Sacramento and San Joaquin Valleys, etc.).

(9½) indicates probably safe to 25° or 26° (San Francisco Bay Region, etc.).

(10) indicates will stand only very light frost.

To find the zone you are in refer to map on center pages of this book, which we use by the courtesy of Arnold Arboretum and McGraw-Hill Book Co.

We hope this innovation will be helpful to nurserymen all over the country. Please understand that ratings show our honest opinion, but we disclaim all responsibility for their correctness.

ABBREVIATIONS—

A. M. R. H. S.—Given an Award of Merit by Royal Horticultural Society of England.

F. C. C. R. H. S. indicates their **First Class Certificate**, which is a distinction rarely conferred.

A. M. C. H. S.—Given an Award of Merit by California Horticultural Society.

LINING OUT STOCK—

For convenience, this is assembled on page 27. The list comprises mainly new and uncommon items, so deserves careful scrutiny.

POT GROWN AND GALLON CAN STOCK—

We find that many customers, especially those at a distance, prefer to have us remove soil and ship "bare roots" packed in moss. If you order this class of material please be sure to say whether you want it packed with or without soil on the roots.

California nurserymen will please note that 4-in. pot stock in body of list can be transferred at once to gallon cans for immediate sale, while the smaller sizes for growing on, together with 2½ and 3-in. pot stock, will usually be found at end of list.

Conifers

Unless otherwise stated all plants in this section will be balled at prices quoted.

For "growing on" sizes see end of this price list.

Broad Leaved Evergreens

Unless otherwise stated all plants in this section will be balled at prices quoted.

For "growing on" sizes see end of this price list.

	10 rate	100 rate
ABELIA hyb. Edw. Goucher (new) (6)		
PINK GLOSSY ABELIA		
A beautiful evergreen hybrid (<i>grandiflora</i> x <i>schumannii</i>) combining the hardiness of the former with the rich pink flowers of the latter. Fine compact habit and very floriferous over a long season. Will surely become a great favorite as "it has what it takes."		
2 to 2½ ft.....	1.50	
1½ to 2 ft.....	1.35	1.25
1 to 1½ ft.....	1.10	1.00
ARBUTUS menziesi (7)		
MADRONE		
5 in. pot 2 to 3 ft.....	1.35	1.25
5 in. pot 1½ to 2 ft.....	1.10	1.00
unedo (7)		
STRAWBERRY TREE		
2 to 2½ ft.....	1.50	1.35
1½ to 2 ft.....	1.20	1.10
1 to 1½ ft.....	1.10	1.00
ARDISIA japonica (5-6)		
Not the plant described in "Bailey" under this name but agrees with Rehder's Manual. The red berries are as large as those of Vantol Holly and produced when plant is only a few inches tall. With us it behaves much more satisfactorily than the better known <i>A. crenulata</i> .		
4 in. pot strong.....	.45	.40
AUCUBA japonica Gold Blotched Male (7)		
3 in. pot 3 to 6 in.....	.35	.30
jap. salicifolia (7)		
We imported this from England six or seven years ago, and, although it has been greatly admired by visitors, we have been compelled to keep all our production to date as a source of supply for cuttings. Leaves are clear deep green, long and narrow. Its great glory lies in its astonishing production of large glossy brilliant red berries in great clusters of as many as fifty or more. It commences to bear when only a few inches tall. Like all female Aucubas, it needs a pollen-bearing plant not too far away.		
4 in pot 6 to 8 in.....	.55	
jap. Golddust (7)		
4 in. pot 6 to 8 in.....	.40	.35
3 in. pot 3 to 4 in.....	.35	.30

yunnanensis (7)		rate	rate
YUNNAN HOLLY			
This beautiful and interesting evergreen Holly offers great possibilities both for garden and pot-plant use. It might be briefly described as Ilex crenata with red berries! Leaves are very small and habit compact. The small flowers, curiously enough, are pink. In open ground it may reach 8 or 10 ft. but for pot use it can be "pinched" to size desired. Plants offered are female and grafted so will bear young.

BROAD LEAVED EVERGREENS

OSMANTHUS (continued)			10	100
suavis (7) (new)			rate	rate
Rehder applies the generic name of Siphonosmanthus to both this and O. delavayi. As the latter is easily one of our very finest plants (sold out this season) we expect this will also prove very good but we have not flowered it yet. The two are supposed to be similar.				
4 in. pot	1½ to 2 ft.55	.50
4 in. pot	1 to 1½ ft.45	.40
OSMAREA burkwoodi (6)				
BURKWOOD OSMAREA				
A bigeneric hybrid between the very beautiful Osmanthus delavayi and Phillyrea decora. Much like O. delavayi but hardier.				
4 in. pot	1 to 1½ ft.45	.40
PHILLYREA decora (6)				
4 in. pot	6 to 8 in.35	.30
PHOTINIA arbutifolia (9)

	3 to 4 ft.	2.25	2.00
	2 to 3 ft.	1.75	1.60
serr. nova compacta (7)				
4 in. pot	8 to 12 in.45	.40
serr. nova lineata (7) (new)				
REDTWIG CHINESE TOYON				
A beautiful mutant originated here. Variegation is slight, mainly a creamy line along midrib. Its great beauty is more due to the bright red twigs and the large, dark green prickly leaves. Has been much admired while under test.				
	1½ to 2 ft.	1.75	1.60
PIERIS forresti (7?)				
CHINESE PIERIS				
A vigorous fairly large shrub attaining 6 to 10 ft. bearing white, fragrant Lily-of-the-Valley-like flowers most profusely in great compound panicles in spring. Even if it never had a flower it would be well worth growing for the vivid red tone of its new growth which at a short distance makes it look like a red flowering shrub. It is not difficult to grow, requiring partial shade and mildly acid soil. F.C.C.R.H.S.

saligna (7)		
WILLOWLEAF SARCOCOCCA		
Growth vigorous and erect. Leaves long and willow-like. Profuse yellow flowers in early winter followed by attractive purple berries.		
3 to 4 ft.....	2.00	
SKIMMIA foremanni (7)		
Imported in 1937! Now first offered to the trade after 8 years but it's worth while for such a fine thing. S. japonica doesn't thrive here but this behaves perfectly. Leaves are larger and so are the bright scarlet berries which have developed here on plants only 6 inches tall. Apparently does not require strongly acid soil but probably prefers shade. The clustered flowers are not showy but are deliciously fragrant. We can find no information about its ultimate size but imagine it won't get over 2 or 3 ft. tall. F.C.C.R.H.S.

HARDINESS MAP

HOW TO USE THIS MAP

From it determine what zone you are in. Every item carrying your zone number **or a smaller number** should be hardy with you. If you want to gamble on those rated **one zone greater**, there is at least a chance for success, but two zones greater will probably be hopeless.

For full explanation of the entire system see inside of the front cover.

Excepting a few "odds and ends" all
other Oriental Magnolias are sold out
for this season.

Lilacs

All are sold excepting the one size offered below. These are about the nicest plants we have ever raised. They are unusually well branched, wide for their height, and should surely please both you and your customers. Fortunately we still have a fairly good supply but don't see how they can last until spring so recommend ordering early.

Numbered varieties have been bred here but not yet fully tested. Our present opinion of their quality can be judged from the group in which each is placed.

We heartily recommend the booklet "Lilacs for America," which contains a wealth of information including quality ratings on all varieties. It can be had by sending \$1.00 to A. H. Scott Horticultural Foundation, Swarthmore College, Swarthmore, Penn.

JAN VANTOL. White.		
DM-21. Ruddy with lighter center.		

Flowering Quinces

CHAENOMELES (Cydonia)

All stock is **grafted**; mainly on Angers Quince.

Without seeing them, anyone can hardly realize how great an improvement has been made in the Flowering Quinces by the 10 or 12 years' work that we have given to breeding them. One good indication is the fact that we have stopped propagating almost all the older sorts as the newer ones are so far superior.

Incidentally, we are open to make exclusive arrangements for the territory east of the Rockies on some of our new originations in this group. If interested please write for particulars.

CATHAYENSIS HYBRIDS (5-6)

A.M.C.H.S. — A.M.R.H.S.

These comprise a new and distinct hybrid species obtained in our nursery by crossing *C. superba* coralina with *C. cathayensis*. The plants are vigorous growers, make short laterals freely and are heavy bloomers. Some are extremely early commencing to bloom in December and January here. All have a second crop and some a third. Fruit very large. This group was granted an Award of Merit by the California Horticultural Society in 1939. We are now very proud to report that the same distinction was given it by the **Royal Horticultural Society of England** in 1943. It was conferred specifically on the variety Enchantress.

Rosemary. Deep rose. **Sold.**

San Jose, B. Deep rose.

#326, B. Brilliant rose-red.

DR-51, BC D Brilliant red.

DR-53, DE. Deep red.

Dwarf Type

This variety is entirely unique in the Cathayensis Hybrids. Most of them by their great vigor showed the prepotency of the Cathayensis "blood," but this one tends toward the Japonica side of the Superba Hybrid which gives it small fruit, a low compact habit and a slight orange cast to the red flowers. It should be hardier than the main group, probably safe in Zone (5). Very interesting from a genetic viewpoint as well as being a handsome shrub. It is dwarf only by comparison with the other Cathayensis Hybrids as it makes a shrub of moderate size. We are using it as a parent and hope for some interesting results.

#304, CD. Dark red.

SPECIAL!

With most good ornamental stock so extremely scarce as to be almost unobtainable it is a great pleasure to be able to offer the following TREE PEONIES to the trade. They are seedlings from named varieties. Plants are from 7 to 11 years old and all have flowered. When in bloom last spring each one was graded A, B or C solely by size and excellence of flowers and also tagged to show color and class. They range from full double to at least semi-double. All plants will be dug and shipped "bare roots" so may be sent to any part of the country at small cost. Assortment of colors must be left to us to assure a fair distribution. We have a fairly large stock but fear it will prove entirely inadequate so recommend ordering early.

VIBURNUM

We believe that the remarkably fine new oriental Viburnums are going to make a great hit with the gardening public. Many of them bear brilliant red berries in great profusion, and now that Cotonasters and Pyracanthas have become so common the gardening public is sure to want something different. These will certainly "fill the bill." Some that do not bear red berries are among the most beautiful and striking flowering deciduous shrubs with a further advantage that quite a few are intensely fragrant.

erubescens (5)		
Even for foliage alone this is a remarkably handsome shrub. Leaves are large and lustrous with red stalks. The faintly fragrant white flowers are borne freely in long racemes or drooping panicles and are followed by berries, at first red and finally becoming black. It looks very good to us.

Grafted Wisterias

Climbing Form

Due to a mild autumn the leaves have not yet fallen, making it impossible to get accurate counts on our grafted Wisterias but we think we are sold out or nearly so.

If customers wish to order "assorted varieties," entirely of our own selection, we will fill if possible, but please do not ask for any large numbers.

300 or more at \$10.00 per 100.

Stock to Grow On

Everything offered below is high grade material which we have grown primarily for our own use but of which we have more than we need for our own planting.

QUANTITY RATES. Not less than 5 of a kind and size will be booked. 25 or more of one kind and size will take 100 rates; less take 10 rates.

PACKING. Free in lieu of cash discount if remittance in full accompanies order; otherwise at cost.

ABBREVIATIONS. 2½p etc., means of course from 2½ inch, etc., pots.

HARDINESS. For hardiness ratings see main part of this list.

PAPER POTS

We are authorized distributors of Bird & Son's famous Neponset paper pots. The red pots are used for shipping and the green pots for growing.

Hitherto we have tried to keep only the red pots in stock at San Jose. From now on we shall have both here in the following sizes. Prices quoted are now f.o.b. San Jose for both colors.

Size	Quantity per case	Price per 1000	
		Red	Green
2½ inch	1000	\$ 5.50	\$ 8.90
3 inch	1000	6.70	10.35
4 inch	500	10.30	16.20
5 inch	500	14.00	23.30
6 inch	500	18.35	30.45

The sizes shown below are also available, but while for the present we are not planning to carry them in stock here, we offer them for direct shipment from the factory, laid down at any point in the Pacific Coast states at the following price schedule:

Size	Quantity per case	Price per 1000	
		Red	Green
2 inch	1000	\$4.85	\$ 7.90
2¼ inch	1000	5.05	8.00
3½ inch	1000	8.60	13.50

All orders must be for unbroken case lots.

Bird's IMPROVED NEPONSET Flower Pots

ROSES

IMPORTANT—Please see outside of back cover

PLEASE NOTE

All summer prices and other quotations not accepted to date are hereby cancelled.

Prices. All prices herein are **strictly net**, to the trade only and for goods at our nursery unless otherwise stated. This list means what it says both as to prices and terms, and we do not deviate from them.

Pots. Prices of pot-grown stock **do not include the clay pots** and unless otherwise instructed, plants will be shipped without them. If wanted in the pots, they will be charged for at cost, but may be returned and full credit will be given.

Specimens. Prices herein are for average good plants but selected specimens will be charged for extra at actual value.

Terms. To buyers of known or established credit, **60 days** net from date of invoice. Otherwise cash with order or 25% with order, balance C.O.D. No "cash discount" except as stated under "Packing" below.

Quantities. 25 or more plants of one kind and size will be supplied at 100 rate and 5 or more at 10 rate, but for less than 5 there will be a surcharge of 20%. This plan avoids the bother of showing needless "each rates."

Grading. Plants wider than tall are graded by width.

Packing. At cost as usual, including paper pots if used. Plants will be packed to secure lowest possible classification consistent with the nature of the goods shipped. For many years we gave free packing when cash came with order. As things are now we can do this only if cost of packing does not exceed 5%. If it does, we will charge packing at cost and apply a credit of 2% of advance payment.

Shipping. Our responsibility ceases when goods are delivered to transportation company in good order. They travel at buyer's risk. Please state distinctly whether you wish goods shipped by freight, express, or truck line.

Complaints. Must be made within 10 days after buyer receives the goods.

IMPORTANT NOTICE FOR EASTERN NURSERYMEN

Out here everything east of the Rockies is "Eastern"!

During January and February we ship several heated refrigerator cars to eastern points. Where size of order justifies, we can nearly always arrange for carload service to destination or some nearby point for pickup or reshipment. The total cost of each car is prorated among all customers who have goods in it.

For years we have also safely made l.c.l. spring shipments to any eastern points by using the southern route via New Orleans or St. Louis. This brings the material to customers at proper time and avoids the freezing weather of the northern route. The freight rate is the same. Up to time of going to press, no restriction has been made to prevent this.

ROSES

We grow three types quite extensively:

Bush and Climbing, Standard or Tree, and plants for greenhouse forcing. All types were long ago sold out for this season. Prices on garden roses for No. 1, medium, and No. 2 grades were:

Bush and Climbing 50c, 45c and 35c.

Standard or Tree \$2.00, \$1.60 and \$1.20.

If you want to get any roses for season 1946-47 we recommend ordering **very soon**. Prices are "open" and to be set next summer. We will book advance orders up to estimated crop only and if results are less than estimate all orders will be prorated fairly.

GARDEN ARISTOCRATS

This is the title of our annual booklet which contains considerably more descriptive material than this list and also includes quite a number of very new things of which the present supply is too small to be offered at wholesale.

In February we will mail a copy to every nurseryman in Washington, Oregon and California whose name is on our mailing list and shall be glad, upon request, to send a copy to any nurseryman elsewhere.

LILAC SHOW

Our annual April show which will be held here at the nursery gives a chance to observe the latest European varieties and also to see what progress we are making in our 14 years' work breeding new kinds.

Nurserymen in the San Francisco Bay region will be notified of date by post card which will be sent on request to any address.

Come if you can!

W. B. CLARKE & CO.

San Jose 2, California
